

## WHAT WE DO

Trina Solar's C&I Solutions are all-in-one equipment and service bundles that make commercial installations easier, faster and more efficient for EPCs and developers.

Our C&I Solutions innovatively combine Trina's world-class PV modules, inverters and versatile racking options. Combined with the benefits listed below, Trina Solar's C&I Solutions can deliver better power gains and lower LCOE to improve commercial solar project value.

Whether it's for a ground mount, rooftop, canopy/carport or single-axis tracker system, Trina Solar's C&I Solutions team has the experience, history and expertise to deliver success for your next project or portfolio.

## MAXIMIZING C&I SOLAR PROJECT VALUE

Major component compatibility and optimization
