

## Eco-photovoltaic greenhouse San Pedro del Pinatar

Campo de Cartagena, Murcia

Commercial rooftop system that uses  
Trina Solar multicrystalline modules

**TSM-PC05** 230W

**2,2<sup>MW</sup>**  
Commercial rooftop system

**9.600**  
modules

**3.126.528<sup>KG CO2</sup>**  
emissions avoided

*“We were very pleased to have Trina Solar as a photovoltaic partner. Our R+D department has been able to develop a solution which combines perfectly both energy and agricultural production in a greenhouse. And the well known resistance of Trina Solar modules in agricultural environments and seaside areas fitted perfectly with this project”.*
